LinkedIn Top quality Assurance Voice | SQA at @Evamp and
Saanga (Delegated to @Salam) | Automation Testing | Selenium |
Appium | Cypress | JMeter | Postman | SDET | Telecom | Fintech
Islāmābād, Pakistan

Summary

I am a software professional specializing in Quality Assurance,
eager to excel in a fast-paced agile environment. I have extensive
experience in all aspects of software testing, including planning,
execution, and reporting.

Tools:
Web Automation: Selenium, Cypress.
Mobile Automation: Appium.
Frameworks: BDD, TestNG, POM , DD
Performance Testing: JMeter
Cross-Browser Testing: Lambda
API Automation: Cypress, Postman
Bug Tracking and Management: Jira

I continuously improve my skills in Software Quality Assurance and
stay updated with industry trends. I am also skilled in programming
languages such as Java, JavaScript, and Python.

My goal is to ensure software products meet the highest quality
standards. I am enthusiastic about using my skills to contribute to
successful projects.

Experience

Evamp & Saanga
SQA
January 2024 - Present (9 months)
Islāmābād, Pakistan

Key Responsibilities:
Develop and document test plans and strategies.

Handle daily scrum with the team to provide support for understanding use cases.

Design and execute functional, integration, system, and regression tests.

Work on both Telecom and health wellbeing projects.

Implement and maintain automated testing frameworks.

Conduct performance, load, and stress testing.

Identify, report, and track software defects.

Collect and analyze quality metrics; prepare test reports.

Collaborate with cross-functional teams to ensure quality standards.

Ensure compliance with industry standards and organizational policies.

Evaluate functionality and user experience of software interfaces.

Conduct regression testing to ensure no adverse effects from changes.

Perform and automate mobile application testing using tools like Appium.

CodesOrbit
QA Automation tester and Manual tester
May 2023 - May 2024 (1 year 1 month)
Islāmābād, Pakistan

Key responsibilities:

Proficiently develop and maintain JavaScript-based test automation scripts for robust testing processes.

Expertly utilize Test Automation Tools and frameworks, including TestNG and Cypress, to optimize testing procedures and ensure accuracy.

Specialize in Performance Testing, employing tools such as JMeter, to assess and enhance system performance.

Take charge of Performance Test Management, overseeing the planning, execution, and analysis of performance tests.

Employ Automated Software Testing techniques to expedite and streamline the testing life cycle.

Skillfully craft comprehensive test plans, encompassing a variety of testing scenarios, to ensure thorough test coverage.

Harness expertise in Test Automation to enhance the efficiency of testing processes and minimize manual intervention.

Maintain an up-to-date knowledge of industry trends and best practices in Test Automation to continuously improve and innovate testing methodologies.

K2X Tech
Software Quality Assurance Engineer
August 2022 - May 2023 (10 months)
Peshawar, Khyber Pakhtunkhwa, Pakistan

Key responsibilities:

Develop and implement test strategies.

Conduct various types of testing activities.

Identify, report, and track defects and bugs.

Collaborate with cross-functional teams.

Document testing results.

Improve testing processes by implementing new tools, methodologies, and best practices.

Stay up-to-date with industry trends.

Pakistan Software Export Board (PSEB)
